

EXPERT CIRCLE

# Read at the highest level. Live with **more** freedom.

A premium radiology reading path for independent radiologists who want control, serious support, and room to scale with Expert Radiology.

RADIOLOGIST PATH

**Start flexible. Build consistency.  
Earn your place in Expert Circle.**

# Radiology, rewritten.

## Make Radiology Understood.

Expert Radiology's mission is to build the best reports on the planet because the old ones were not good enough.

### WHY IT MATTERS

## A better read carries more clarity.

Radiology should do more than interpret the image. It should help patients understand, attorneys evaluate, providers act, and radiologists work from a clearer standard.

### OUR MISSION

## Make radiology understood.

Clearer reports, visual proof, and support systems that help patients, providers, attorneys, and radiologists use the information with confidence.

### OUR VALUES

## Five principles

The standards behind every report, relationship, and reader experience we build.

- 01 Raise the Standard**  
Improve the report, the workflow, and the bar every time.
- 02 Relentless Drive**  
Own the hard problem and keep moving until it is solved.
- 03 Deliver. Period.**  
Protect the standard, the timeline, and the outcome.
- 04 Build What's Next**  
Reimagine the report, the reader path, and what clarity can do.
- 05 Earn Trust**  
Every read and every relationship has to hold up.

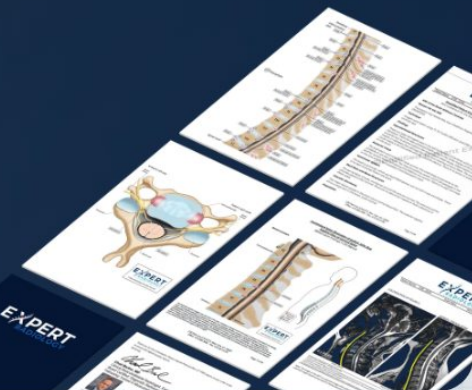

# Better reports. Better reading lives.

Our commitment is simple: keep building clearer MRI reports and a better reading life for the radiologists who make them possible.

## REPORT QUALITY

### We're building the clearest MRI reports on the planet.

A better read shows findings, context, and clinical meaning clearly enough for every stakeholder to act with confidence.

## READER EFFICIENCY

### Make excellent reading easier to sustain.

A better reading life protects focus, reduces friction, and helps high-quality work repeat without swallowing the rest of life.

EXPERT CIRCLE PROGRAM

# Expert Circle is a serious reading path, built to scale.

Our Expert Circle is designed to meet you at the level of reads you are ready for. Start flexible if that fits, or earn your way straight into Expert Circle with full-time reading volume, deeper support, better planning, and more upside as your contribution grows.

→ **ENTER READY**  
flex or full-time

↗ **SCALE VOLUME**  
read more consistently

☆ **EARN THE CIRCLE**  
support and upside

# Choose your own path.

Read at the level that fits your capacity, then unlock more support, priority, upside, and infrastructure as your volume grows.

Choose the program level that matches your read.	CORE <b>Core Reader</b> 1-1,199 / month Flexible core lane	PREMIUM <b>Expert Circle</b> 1,200+ / month Full-time destination	TOP TIER <b>Expert Circle +</b> 2,000+ / month Highest support lane

<b>Retreat eligibility</b>	—	<input checked="" type="checkbox"/>	Preferred

Program levels and benefits are draft recruiting language and may vary by eligibility, volume, specialty fit, and leadership approval.

# What each benefit means.

A practical guide to the support, setup, visibility, and infrastructure behind the program levels.

## 01 / ACCESS

### Flexible reading access

Readers can control availability and build into the amount of work that fits their life, specialty, credentialing, and capacity.

## 02 / SUPPORT

### Reader support

A clear path for onboarding, scheduling, credentialing, payment, IT, case-flow, and workflow questions, with more proactive support as contribution grows.

## 03 / SETUP

### Workstation support path

Requirements, PACS and dictation setup, templates, and support first, with approved reading-station help available as the relationship scales.

## 04 / VISIBILITY

### Monthly scorecards

A monthly view of volume, consistency, workflow fit, and quality signals so readers know where they stand and what unlocks next.

#### 05 / SCHEDULE PLANNING

## Priority block consideration

Consistent readers can be considered earlier for recurring blocks, full-month planning, and better visibility into where their availability fits the network.

#### 06 / APPROVED WORK

## Malpractice coverage

For qualifying Core Reader and Expert Circle work, practice-level coverage can become part of the support package, subject to approved program rules and eligibility.

#### 07 / INDEPENDENT SETUP

## 1099 business formation help

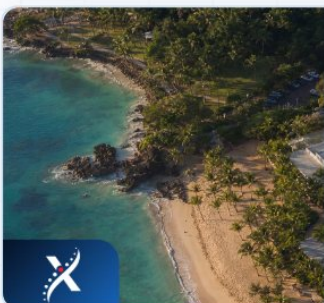

Expert Circle readers can receive guidance and support for the independent-practice setup that usually slows high-volume 1099 reading down before it starts.

#### 08 / UPSIDE

## Shared Success eligibility

A draft bonus-eligibility lane for high-contribution readers who are in good standing and helping the system win, subject to approval.

#### 09 / COMMUNITY

## Retreat eligibility

Recognition, connection, and leadership access for readers who become part of the core Expert Radiology bench.

Benefits are draft recruiting language and may vary by eligibility, volume, specialty fit, quality, communication, company need, and leadership/legal/operations approval.

# Choose your pace. Choose your pay.

Expert Radiology's public compensation frame is built around flexible volume, high-efficiency outpatient MRI reading, and annualized earning potential that scales with availability and performance.

## HISTORICAL CONTRACTOR CONTEXT

# \$500-\$900+ / hr

Historical range depends on volume, efficiency, case mix, licensure, and market conditions. Individual results vary.

## TOP QUARTILE ANNUALIZED

# \$1.6M+

Based on top-quartile historical context at roughly full-time annualized reading hours.

## FLEXIBLE LANE

### Part-Time

# \$200-\$500K

annually

A flexible lane for readers who want meaningful volume without giving up academics, family, or other commitments.

## MOST POPULAR

### Full-Time

# \$1M-\$1.6M

annually

For radiologists who want Expert Radiology to become their primary reading lane, with earning potential tied to sustained availability, pace, efficiency, and fit.

## TOP QUARTILE

### High-output

# \$1.6M+

annually

For high-efficiency readers with strong case fit and available volume. This is the upper outcome path, not a guaranteed compensation promise.

Illustrative annualized earnings. Not an offer of compensation. Individual results vary by availability, volume, efficiency, case mix, licensure, and market conditions.

# Built so you can read.

## WHAT SUPPORT MEANS

### Turnkey service around the radiologist

Expert Circle is built to remove the loose ends that make high-volume reading harder than it needs to be. Support is not one perk. It is an operating layer around the reader: clearer routing, faster answers, better setup, stronger planning, and visibility into what helps the next level unlock.

The goal is to keep administrative drag from stealing attention from interpretation. When infrastructure is handled, radiologists can focus on the work that actually matters: reading clearly, moving efficiently, protecting quality at scale, and preserving more flexibility in the rest of life.

#### ✕ **Reader Concierge**

A direct lane for scheduling, credentialing, payment questions, IT, workflow issues, and case-flow escalation. When something blocks the read, support owns the handoff so the reader is not chasing the same issue in three places.

#### ✕ **Setup Path**

Support starts with the mechanics of reading: workstation readiness, PACS/RIS access, dictation setup, templates, malpractice coverage, and 1099-readiness guidance. As volume grows, the support path gets more proactive.

#### ✕ **Efficiency Coaching**

Efficiency is treated as a skill, not a personality trait. Dr. Knapp's reading philosophy helps serious radiologists sharpen scanning habits, reduce wasted motion, protect report quality, and sustain pace across real volume.

#### ✕ **Scorecards + Planning**

Monthly scorecards make the program visible. Readers can see volume, consistency, quality signals, block fit, and the practical path toward stronger priority, deeper support, and higher program levels.

## Less admin. More excellent reading.

Expert Radiology provides best-in-class support and infrastructure so radiologists can focus on excellent reading.

# A circle worth earning.

Expert Circle is where high-contribution readers become part of something bigger than case work: a bench, a feedback loop, and a recognition path.

## WHAT THE CIRCLE MEANS

### You are joining a bench, not a queue.

Expert Circle is designed for radiologists who want to read at a serious level without feeling isolated inside the work. The community is meant to create context: people who understand the cases, the workflow, the pressure, and the goal of building better reports.

Recognition matters because high-volume reading is not invisible here. Milestones, scorecards, retreat eligibility, advisory access, and peer connection are ways to make contribution seen, supported, and worth building around.

This is not a generic reader network. It is a smaller circle of serious radiologists with shared standards, better feedback, and a path to sustainable excellence.

#### ✕ **Mentorship with a name.**

A real handoff, named support, and clinical context from people who know the queue, the clients, and the workflow.

The payoff is faster confidence: fewer loose ends, clearer expectations, and an actual person helping the reader get settled.

#### ✕ **Learn from the bench.**

Peer connection should make the work better: specialty backup, efficiency ideas, edge-case discussion, and practical reading-life experience.

The bench becomes a place to sharpen judgment, share what works, and learn the habits that make volume sustainable.

#### ✕ **Milestones get seen.**

Expert Circle recognizes consistency, quality, reliability, volume, and leadership inside the reader network.

Milestones, scorecards, advisory access, and retreat eligibility give high-performing readers a clearer sense of progress and place.

#### ✕ **A burnout-resistant life.**

The goal is not only more work. It is better rhythm: serious reading, real support, peer connection, and room to live outside the queue.

A strong reading life should reward focus without asking the radiologist to give up the rest of life to earn it.

# Find the right reading fit.

## Start basic. Or enter ready.

Expert Circle is built for radiologists who want clear placement: a flexible entry point when that fits, and a serious volume path when you are ready.

### 01 ACTIVE READER PATH

#### Start with control.

Begin with flexible volume, learn the workflow, build trust, and see how the read fits your life.

### 02 CORE + EXPERT CIRCLE PATH

#### Come in ready for volume.

If you already know you want meaningful capacity, you can ramp quickly toward core-reader and Expert Circle levels as quality and availability are proven.

### 03 FELLOWSHIP + EARLY ATTENDING

#### Launch in a better place.

Move from training into the right specialty lane with feedback, workflow discipline, and a cleaner path to efficient reading.

#### FIT SIGNALS

### What tells us this can work.

Specialty strength in outpatient MRI, especially neuro, MSK, or spine, with interest in repeating the same focused lane well.

Clear communication, reliable follow-through, and judgment under volume: the habits that let support build around you.

A serious desire to improve speed while protecting quality, using feedback, scorecards, and workflow discipline to keep getting sharper.
